

UTHSC Teaching and Learning Center

Downloading and installing the FileZilla FTP Client

FileZilla FTP Client can be used to upload Adobe Presenter Presentations to the connect.uthsc.edu server. Below are necessary instructions for downloading and installing this client.

NOTE: These instructions were created using Mozilla FireFox. If you are using a different browser, your download steps may vary.

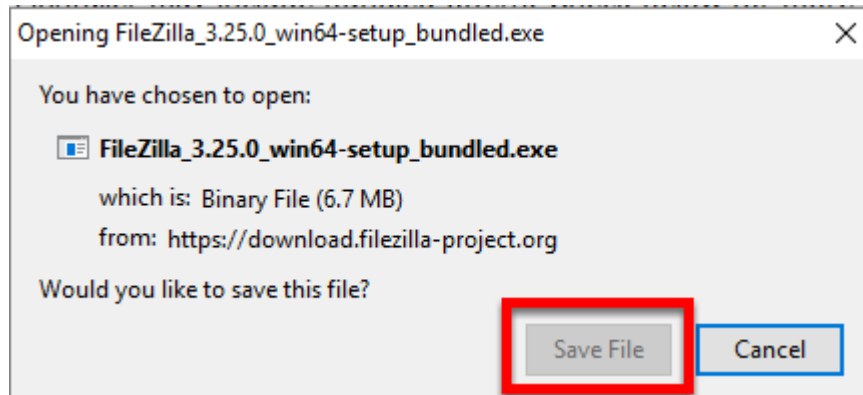

Using a web browser, go to filezilla-project.org/download.php and click Download FileZilla Client

Click on **Download FileZilla Client** to download the client

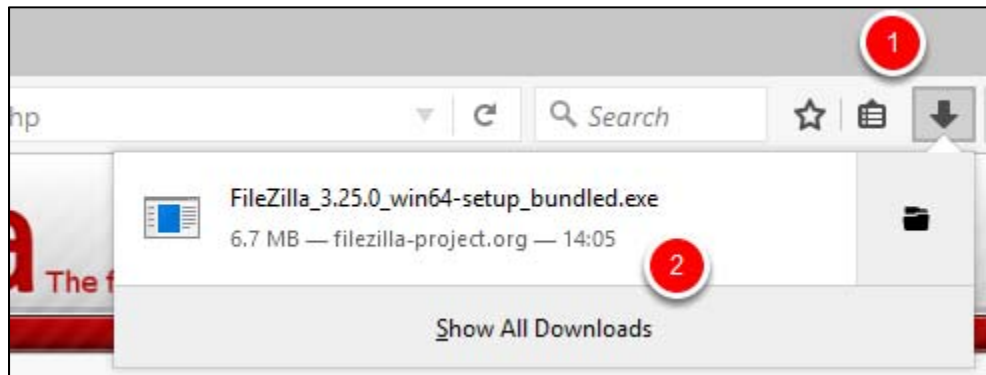

UTHSC Teaching and Learning Center

When prompted with a warning, click on the Save File button

The download will begin.

Run the installation file

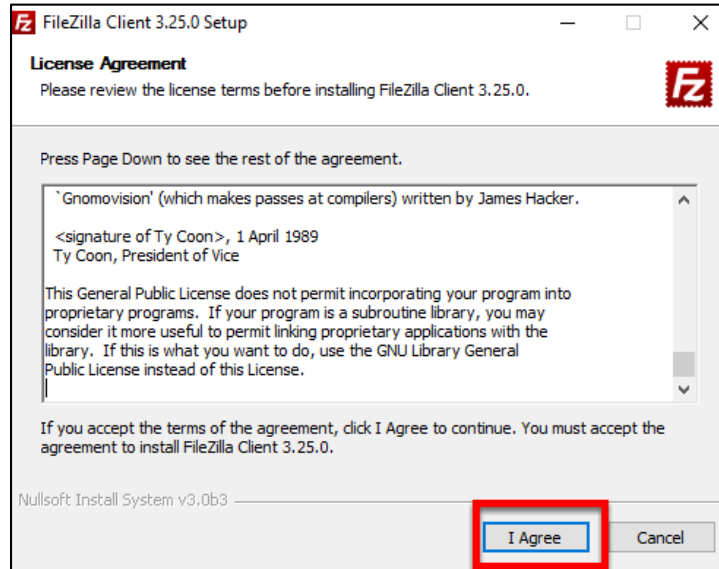

To run the installation file,

1. Click on the download arrow (or Ctrl + J)
2. Click on the FileZilla installation file (it should be the most recent file)

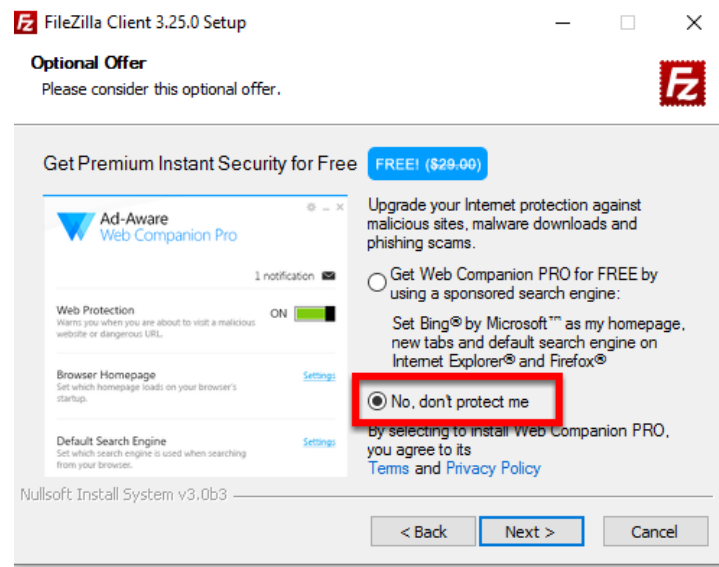

*If you get an **Open File - Security Warning** popup, click on **Run** to start the installation*

UTHSC Teaching and Learning Center

The FileZilla Client installation will begin, click I Agree to continue

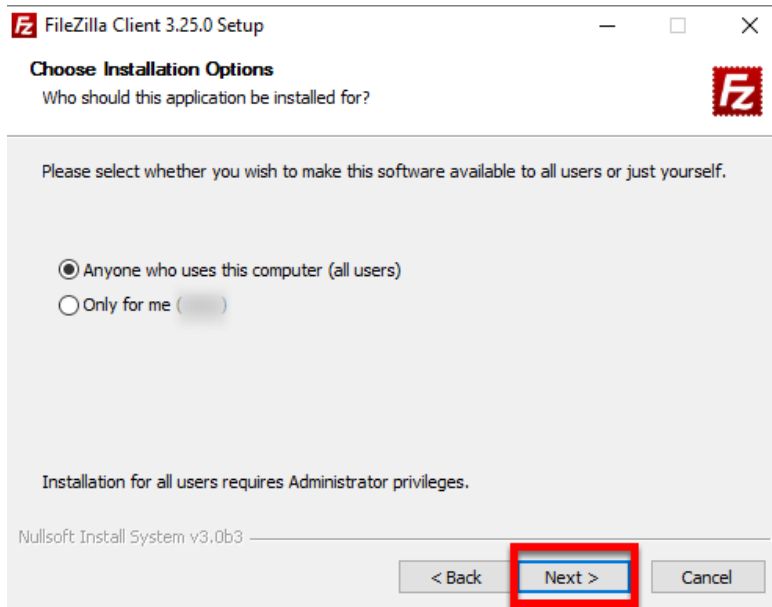

You will be given the option to download extra Software that are not required to run FileZilla. Decline the offer and click next

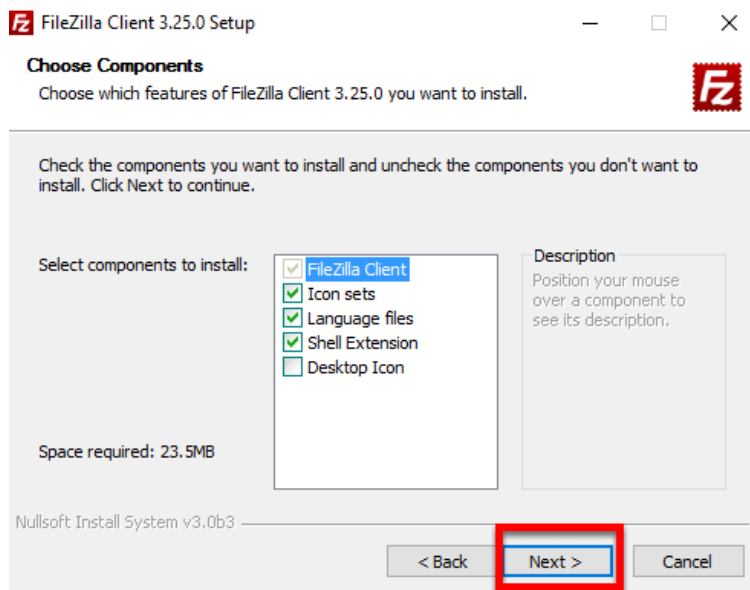

Select the option: **No, don't protect me** then click **Next**

UTHSC Teaching and Learning Center

Click Next

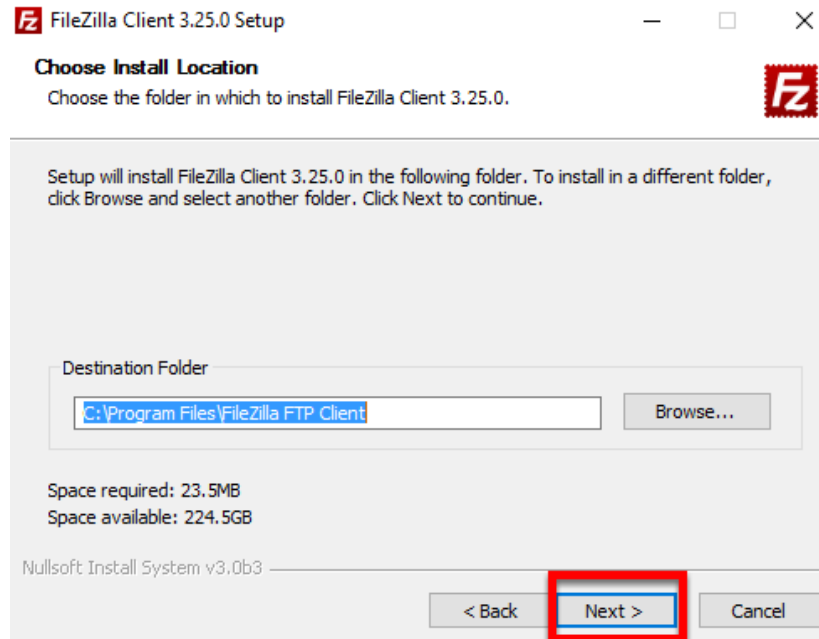

Click Next

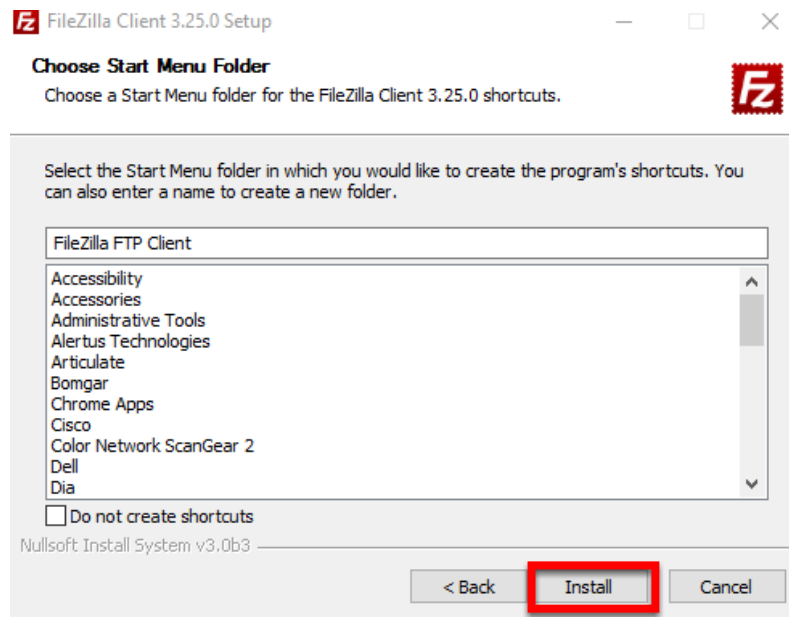

UTHSC Teaching and Learning Center

At this point you have the ability to change the default install location for the client. It is not necessary to change it, so click Next.

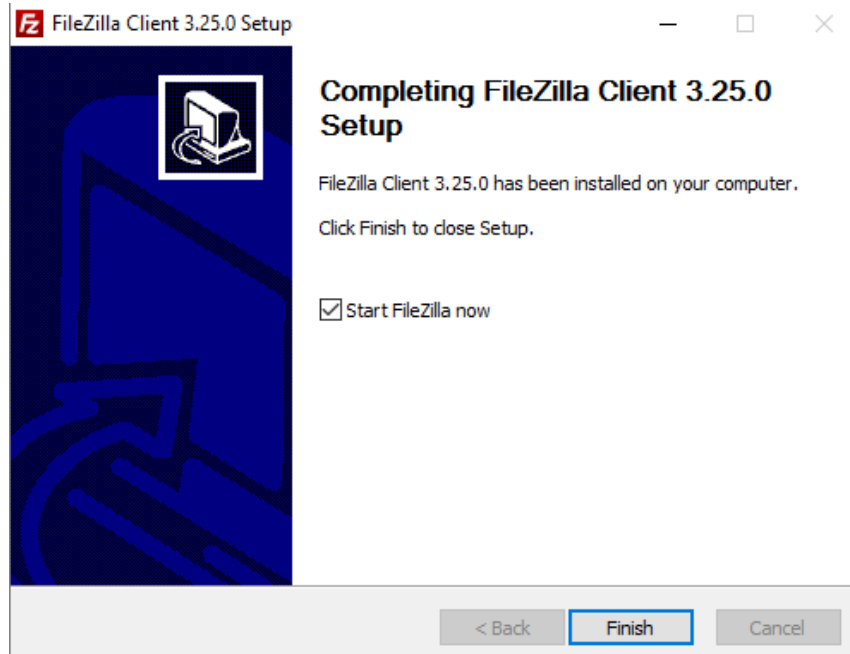

Click on Install to start the installation process

UTHSC Teaching and Learning Center

The installation is complete.

If you would like to open FileZilla, check box next to **Start FileZilla now** and click **Finish**.
